

FANCO WARRANTY STATEMENT

The benefits conferred by this express Fanco warranty are optional and are in addition to all relevant implied warranties, rights and remedies available under Australian Consumer Law.

If you encounter issues with the fan during installation, Fanco highly recommends having the installing electrician contact Fanco for trouble shooting assistance if the installation is during business hours on 03 8658 9588

IMPORTANT: *If you would like to make a claim under this warranty, ensure the ceiling fan is left installed (the wiring does not need to be connected if there is an electrical fault). Please read the following guide to ensure your warranty claim follows the warranty conditions and is processed as efficiently as possible.*

Warranty details:

Fanco warrants this ceiling fan against defects and offers an 'in home warranty' service, meaning the warranty includes the installation of replacement parts or replacement fan in cases where an electrician is required. The in-home component of this warranty covers only actual electrical work undertaken, on or to the ceiling fan. All parts deemed defective in workmanship or materials will be replaced free of charge during the warranty period.

Major defects in a ceiling fan are:

1. Does not rotate properly or at all due to an internal electrical or mechanical fault
2. A loud motor noise which is caused by an internal electrical or mechanical fault (NOT a noise caused by incorrect installation, and not a slight hum that is not considered a fault).
3. For new fans that have just been unpacked, broken or damaged non-detachable parts (eg motor housing)

Fanco warrants this ceiling fan to perform to its published features and specifications only. The Fanco warranty does not cover situations where the product does not perform to the expectation of a user, or for a use that it was not specifically designed for, but it does perform to its published features and specifications.

Slight variations of speed may occur between the same model of fan and slight humming or electrical noises may occur and be more noticeable at night. This is the nature of the product and not deemed a fault covered by warranty. Other noises which may occur from external influences and are not covered by warranty include but are not limited to; power supply "noise" and intermittent "humming" from mains power delivery infrastructure, signals sent through the power grid by the electricity provider for the control of off peak hot water and street lights. Filters for blocking/reducing such signals are available in Australia at the customer's expense.

IMPORTANT: The 'in home' repair/replacement service- is carried out by Fanco service agents once the warranty claim has been approved. Fanco will not reimburse repair/replacement work done outside the warranty process.

In cases of in-home repair/replacements in areas outside the coverage of Fanco service agents, subject to conditions, Fanco will reimburse customers a standard fee of \$95.00 (inc. GST) for using

their own electrician. This reimbursement will be paid directly to the Customer once the warranty claim has been approved and Fanco has determined there are no FANCO service agents available in the area. Fanco will not accept warranty claims for reimbursement of service work completed that has not been authorised through the warranty process.

Warranty Period

- The warranty period for this ceiling fan is **2 years**.
- The warranty period begins from the date of purchase, as determined by the tax invoice provided by the authorised retailer.
- Batteries are not covered by warranty.

Warranty Limitations and Conditions

- **Installation by Qualified A-Grade Electrician** – Evidence that the Fanco ceiling fan was installed by a qualified A-Grade Electrician and in compliance with Australian law must be provided for the warranty claim to be processed. The most acceptable form of evidence is the certificate of electrical compliance issued by the electrician.
- **Proof of Purchase** – Proof of purchase from an authorised retailer specifying the fan model and purchase date (such as a tax invoice) must be supplied for the warranty claim to be processed.
- **Ceiling Fan must be installed for in home warranty to apply** – The Fanco Ceiling fan must have been installed by a qualified electrician and must remain installed for the in home warranty service to apply. If there is an issue with the wiring, the fan should be left installed without the wiring connected.
- **Outdoor Installation** – This product is not intended or recommended for, and is therefore not warranted for use outdoors including covered and/or enclosed alfresco areas.
- **Reasonable wear and tear** – is not covered by warranty. The client should ensure the fan is regularly cleaned and any screws and blade nuts that become loose through normal operation are tightened. This is not covered by warranty.
- **Domestic/Personal Use only** - This product is not designed or intended for industrial or commercial use and therefore the warranty will not cover such use.
- **Purchase from Authorised Retailer**– In order for the warranty to apply, the Fanco Ceiling fan must have been purchased in Australia from an **authorised retailer** (please see the Fanco website for a list of authorised retailers).
- **Fanco Warranty Applies in Australia Only** – Fanco warranty is only available for products installed and being used in Australia.
- **Extra Costs** – In-home service warranty will cover access to ceiling fans installed on standard ceilings where a service person does not require a ladder greater than 2 metres in height. Australian OH&S legislation may require special measures and protective equipment be used in situations where people are required to work more than 2m above floor level or where a hazard exists. Any extra costs incurred to service the ceiling fan that arise from such situations such as requiring extension ladders, scaffolding or other non-standard equipment will not be covered by the warranty and must be paid for by the client.
- **Installations with unsafe or impractical access** - Fanco and its service agents reserve the right to refuse service to ceiling fans and their accessories which are deemed by Fanco

warranty claim assessors or Fanco service agents to be unsafe or impractical to access. In these cases Fanco will still supply a replacement of any faulty products. At Fanco's discretion, if a service agent has not already attended the warranty claim, the client may be reimbursed a standard fee of \$95.00 (inc. GST) for using their own electrician.

- **Location change** - This limited warranty does not cover any damages to hard-wired products if it is moved from the original location of installation to another during the warranty period.
- **Incorrect Installation/Misuse/damage of product** – is not covered by warranty. The Fanco ceiling fan must be installed and used according to the installation manual and user guidelines. Damage caused by external factors such as (but not limited to) power supply faults/surges, water damage, lighting and other Acts of God is not covered by this warranty. Fanco fans must only be installed and used with compatible accessories as specified by Fanco. Use with or wiring with non-authorized accessories and/or other items will void this warranty.

If a Fanco Service Agent determines a problem with the product is due to incorrect installation or misuse of the product, the product will not be replaced or repaired under warranty, the remainder of the warranty will be terminated and the client will be liable for a \$95 inc GST call out fee.

Fanco does not accept liability for any direct or consequential damage, loss or other expense arising from misuse or incorrect installation and operation of the appliance.

Warranty Claims

Please submit any warranty claims **in writing** by one of the following methods;

1. Email to: service@fanco.com.au and attaching the required documents
2. filling out the warranty claim form on the Fanco website and attaching the required documents
3. filling out the warranty claim form provided in the ceiling fan box and posting to the address provided with the required documents

Please ensure all warranty claims are in accordance with the warranty conditions and limitations outlined above and that you include:

1. Proof of purchase
2. Evidence of installation by a qualified and licensed electrician such as an electrical certificate of compliance

Please allow up to four days from receipt of your warranty claim for a response.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss of damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
